

Top 50 Short-Forms / Acronyms

Used in Corporates

◆ 1. ASAP –

As Soon As Possible

Simple explanation: Do it quickly, without delay.

Why common: Managers use it to push tasks; employees use it to show urgency.

Example 1: “Please send me the report ASAP.”

Example 2: “The client requested the design ASAP; can you handle it today?”

Usage note: Can be vague → clarify exact deadlines: “ASAP today or by EOD tomorrow?”

◆ 2. FYI –

For Your Information

Simple explanation: Just sharing info, no action needed.

Why common: Saves time, avoids unnecessary back-and-forth.

Example 1: “FYI, tomorrow’s meeting is canceled.”

Example 2: “FYI, the server will be down for maintenance tonight.”

Usage note: Politer than just forwarding info; too much use can feel curt.

◆ 3. ETA –

Estimated Time of Arrival

Simple explanation: When something is expected to arrive or finish.

Why common: Tracks progress in projects, deliveries, or updates.

Example 1: “What’s the ETA for the client deck?”

Example 2: “ETA for the shipment is 3 PM today.”

Usage note: Helps manage expectations; without it, people assume delays.

◆ 4. EOD –

End of Day

Simple explanation: Deadline for completing a task by day’s end.

Why common: Daily used in emails, updates, and task tracking.

Example 1: “I’ll finish this by EOD.”

Example 2: “Please submit your weekly report by EOD Friday.”

Usage note: Ambiguous → could mean 6 PM or midnight depending on context.

◆ 5. KPI –

Key Performance Indicator

Simple explanation: Metric used to measure success.

Why common: Used in appraisals, projects, and team goals.

Example 1: “Customer satisfaction is our main KPI.”

Example 2: “Sales conversion rate is a critical KPI for our team.”

Usage note: Usually tracked monthly, quarterly, or yearly, not daily.

◆ 6. ROI –

Return on Investment

Simple explanation: Value or benefit gained from resources spent.

Why common: Used in finance, marketing, projects to justify efforts.

Example 1: “What’s the ROI on this campaign?”

Example 2: “Investing in this training has a high ROI for employee productivity.”

Usage note: ROI can be financial, efficiency-based, or even learning outcomes.

◆ 7. MOM –

Minutes of Meeting

Simple explanation: Written summary of a meeting’s points.

Why common: Prevents miscommunication and keeps everyone aligned.

Example 1: “Please share the MOM.”

Example 2: “MOM includes action items and deadlines for each team member.”

Usage note: Helps track decisions and follow-ups.

◆ 8. OOO –

Out of Office

Simple explanation: You’re not working or unavailable.

Why common: Seen in emails or chat statuses.

Example 1: “I’ll be OOO on Friday.”

Example 2: “OOO today, contact my backup for urgent issues.”

Usage note: Always provide an alternative contact if possible.

◆ **9. WFH –**

Work From Home

Simple explanation: Doing office work remotely.

Why common: Popular post-COVID; many companies have hybrid policies.

Example 1: “Team is WFH today.”

Example 2: “I’ll WFH tomorrow as I have a delivery at home.”

Usage note: Follow company’s remote work guidelines.

◆ **10. TL;DR –**

Too Long; Didn’t Read

Simple explanation: Quick summary of long content.

Why common: Saves time in emails, messages, or documents.

Example 1: “TL;DR – client approved the proposal.”

Example 2: “TL;DR – project delayed by two weeks due to supplier issues.”

Usage note: Use to highlight essentials, not skip important info.

◆ **11. POC –**

Point of Contact

Simple explanation: Main person to contact for a task/project.

Why common: Clarifies responsibility and accountability.

Example 1: “John is the POC for testing.”

Example 2: “Email Sarah, the POC, for onboarding queries.”

Usage note: Always provide name + contact details.

◆ **12. SOP –**

Standard Operating Procedure

Simple explanation: Step-by-step instructions for tasks.

Why common: Ensures consistency and quality.

Example 1: “Follow SOP for client calls.”

Example 2: “Refer to the SOP before using the new software tool.”

Usage note: Essential in audits, compliance, and training.

◆ **13. TAT –**

Turnaround Time

Simple explanation: Time taken to complete a request.

Why common: Used in service, approvals, and ticket management.

Example 1: “What’s the TAT for invoices?”

Example 2: “Our TAT for customer queries is 24 hours.”

Usage note: Often part of service level agreements (SLAs).

◆ 14. SLA –

Service Level Agreement

Simple explanation: Contract defining service standards.

Why common: Ensures commitments are clear between provider and client.

Example 1: “We must meet SLA of 99% uptime.”

Example 2: “SLA states resolution within 4 hours for critical issues.”

Usage note: Breaching SLA may lead to penalties.

◆ 17. CRM –

Customer Relationship Management

Simple explanation: Software to manage clients and sales.

Why common: Helps sales and marketing track leads & interactions.

Example 1: “We track clients in our CRM.”

Example 2: “Update all client calls in the CRM by EOD.”

Usage note: Salesforce, Zoho, and HubSpot are common CRMs.

Non-Disclosure Agreement

Simple explanation: Contract to keep info confidential.

Why common: Protects sensitive info in projects or partnerships.

Example 1: “Sign NDA before we share project details.”

Example 2: “NDA prevents sharing internal research outside the team.”

Usage note: Standard in vendor or client work.

◆ 19. PTO –

Paid Time Off

Simple explanation: Paid leave days.

Why common: Defined in HR policies for employee leave.

Example 1: “I’m taking PTO on Monday.”

Example 2: “Use your PTO wisely to avoid burnout.”

Usage note: Policies vary by company.

◆ 20. R&R –

Roles & Responsibilities / Rewards & Recognition

Simple explanation: Either job duties or appreciation.

Why common: Context determines meaning.

Example 1: “Let’s clarify R&R before starting the project.”

Example 2: “R&R ceremony for top performers is next week.”

Usage note: Confirm context before assuming meaning.

◆ 21. JD –

Job Description

Simple explanation: Document listing job tasks and expectations.

Why common: First insight candidates get about roles.

Example 1: “JD mentions required skills.”

Example 2: “Read JD carefully to prepare for the interview.”

Usage note: Check every detail before applying.

◆ 22. L&D –

Learning & Development

Simple explanation: Team that provides training and skill growth.

Why common: Supports career development and employee growth.

Example 1: “Our L&D team conducts workshops.”

Example 2: “Enroll in L&D courses to upskill in Excel and Power BI.”

Usage note: Employees should actively use L&D opportunities.

◆ 23. MNC –

Multinational Corporation

Simple explanation: A company that operates in multiple countries.

Why so common: Many professionals aim to work in MNCs due to better pay, exposure, and brand value.

Example 1: “He works at an MNC in Bangalore.”

Example 2: “MNCs often offer international transfers and training programs.”

Usage note: Often associated with brand prestige and structured work culture.

◆ 24. OKR –

Objectives & Key Results

Simple explanation: Framework to set and track strategic goals.

Why so common: Helps teams stay aligned on key priorities and track measurable outcomes.

Example 1: “Our OKR is boosting customer retention.”

Example 2: “Team’s OKR for Q4 is to increase website traffic by 20%.”

Usage note: More strategic than KPI; focuses on outcomes rather than daily metrics.

◆ 25. PIP –

Performance Improvement Plan

Simple explanation: Formal plan to help underperforming employees improve.

Why so common: Used by managers before termination; also gives a structured improvement opportunity.

Example 1: “The employee is on a PIP for missing deadlines.”

Example 2: “HR discussed PIP goals to support skill development.”

Usage note: Seen as negative but can be leveraged for growth if taken seriously.

◆ 26. FTE –

Full-Time Employee

Simple explanation: Employee on permanent payroll working full hours.

Why so common: Differentiates full-time staff from interns, freelancers, or contractors for budgeting and reporting.

Example 1: “We hired 20 FTEs this quarter.”

Example 2: “FTE count helps in calculating overall workforce cost.”

Usage note: Important for headcount planning and resource allocation.

◆ 27. CTC –

Cost To Company

Simple explanation: Total salary package including perks.

Why so common: Standard in Indian hiring; gives a clear view of total employee expense.

Example 1: “What’s your expected CTC?”

Example 2: “CTC includes basic, HRA, bonus, and insurance.”

Usage note: Not just take-home salary; consider all components.

◆ 28. RFP –

Request For Proposal

Simple explanation: Document inviting vendors to submit project proposals.

Why so common: Essential in procurement, vendor selection, and project outsourcing.

Example 1: “Vendor submitted an RFP for the software upgrade.”

Example 2: “The company released an RFP to hire a marketing agency.”

Usage note: Often includes technical specs, budget, and deadlines.

◆ 29. SME –

Subject Matter Expert

Simple explanation: Specialist with deep knowledge in a field.

Why so common: Projects rely on SMEs for accuracy and expertise in critical decisions.

Example 1: “Check with the SME before finalizing the report.”

Example 2: “SME will train the team on regulatory compliance.”

Usage note: Always respect their insights; they drive quality.

◆ 30. N/A –

Not Applicable / Not Available

Simple explanation: Info doesn’t apply or isn’t provided.

Why so common: Helps standardize forms, reports, and dashboards.

Example 1: “This section is N/A.”

Example 2: “Field N/A if you have no comments.”

Usage note: Avoid leaving blanks; N/A clarifies context.

◆ 31. TBD –

To Be Decided / Determined

Simple explanation: Decision is pending or not finalized.

Why so common: Keeps planning flexible in dynamic projects.

Example 1: “Meeting room TBD.”

Example 2: “Project launch date is TBD.”

Usage note: Always follow up to confirm details once finalized.

◆ 32. FAQ –

Frequently Asked Questions

Simple explanation: List of common questions and answers.

Why so common: Saves time for both employees and clients by addressing repetitive queries.

Example 1: “Refer to the FAQ before emailing support.”

Example 2: “FAQ section explains account setup and password reset.”

Usage note: Always check FAQ first; it avoids unnecessary back-and-forth.
